

YALE UNIVERSITY  
OSBORN BOTANICAL LABORATORY  
NEW HAVEN, CONNECTICUT

M.B.L., Woods Hole, Mass.  
August 26, 1947.

Dear Tony,

As you know, I'd planned to come back to P&S next month. That's changed now. The Univ. of Wisconsin has appointed me Assistant Professor of Genetics, to set up a program of research in micro-organisms. It looked like too good a set-up to turn down. We have just come back from Madison where we went for interviews, etc.

You may know that Wisconsin has just inveigled another P&S man to settle there- D. Green. It's a very pleasant place. The only trouble is that my lab has to be set up from scratch; while there's plenty of money, the delivery situation on scientific eqpt. is very slow, and it may take sometime to get started.

We'll be back in New York about the second week in Sept., I hope we can see you then, so let it be known where you are around that time. Best regards to all-

Josh.
